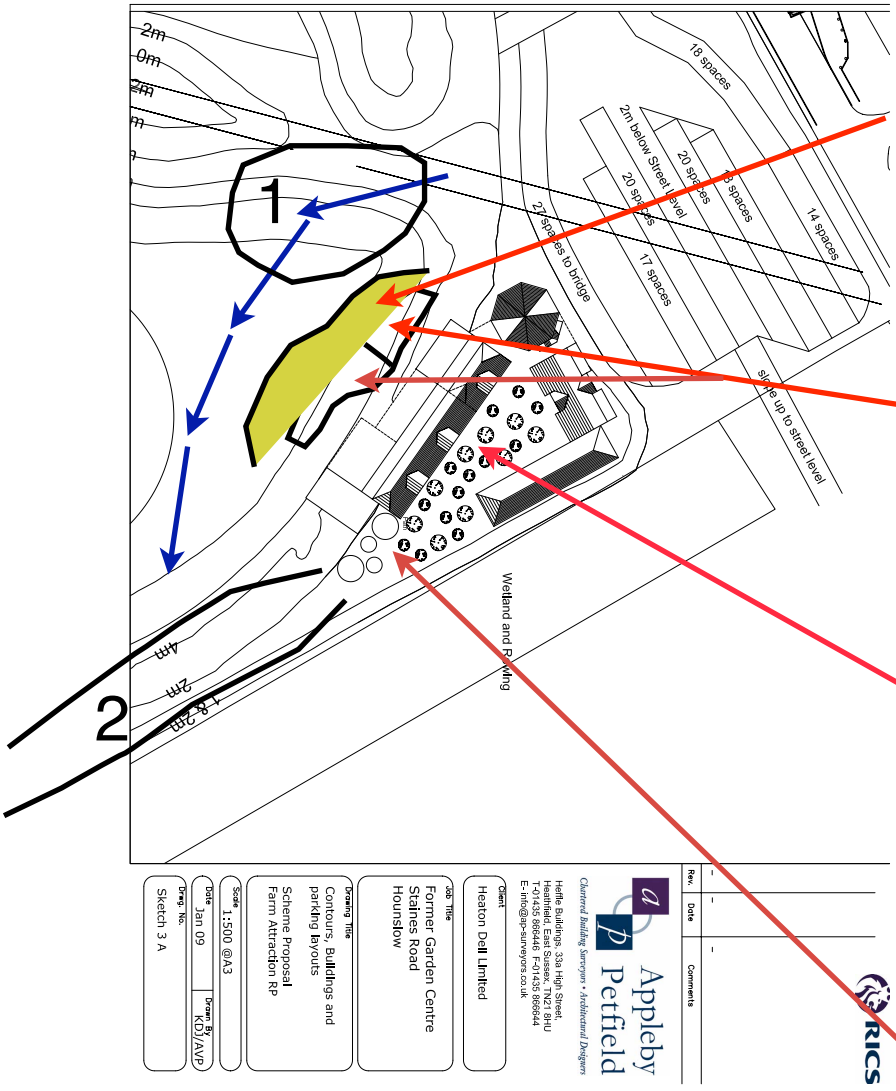
Farm Attraction Plantings



Ribbon of Gorse. This will protect the sheep from above. It flowers virtually every month of the year. Will link across to the heath. Once it matures a bit it can be included within the paddock(s)

Fenced Sheep Paddock(s)
The choice of 2 paddocks (both easily accessible to the public) could allow the grass to be grazed in rotation ?

Shade trees
Living shade is preferable to man made. A few umbrellas will be required till the trees are of sufficient size. Both together should be within the design. The trees to be :- Planes, London (*Platanus x hispanica*)& Oriental (*P.orientalis*), Copper Beech & Jelecote Pine (*Pinus patula*)
Group of 3 Jelecote Pine @ the SW corner introduce the “needle” texture which leads on to tree Area 2

Flow planting from Car Park to Pavilion

Tree Area 1 Group plantings of Yuccas and Phormiums flow from the Car Parking over the Hill above the Sheep Pens

Tree Area 2
We wander through semi-prostrate P.mugo with the plant height around you climbing up with repeat use of Jelecote Pine leading on to Atlantic Blue Cedars as we approach the “Great Pavilion”.
